

17 PARTNERSHIPS FOR THE GOAL

6514 Campus Population

20 Number of Documents Publications

Universitas Muhammadiyah Surabaya is committed to advancing SDG 17: Partnerships for the Goals by actively fostering collaborations that strengthen education, research, and community development. The university builds strategic alliances with government institutions, industry partners, NGOs, international universities, and professional organizations to accelerate progress toward sustainable development. Through these partnerships, UM Surabaya enhances resource mobilization, expands knowledge-sharing networks, and ensures impactful contributions to regional, national, and global sustainability goals.

RESEARCH

On June 5, 2023, Universitas Muhammadiyah Surabaya once again demonstrated its commitment to supporting the achievement of the Sustainable Development Goals (SDGs) through world-class research. The success of UMSurabaya lecturers in securing funding from the USAID–Integrity Multidisciplinary Research on Anti-Corruption grant highlights the institution's capacity to produce research that directly contributes to global goals, particularly SDG 16: Peace, Justice, and Strong Institutions.

This funding also strengthens UMSurabaya's position as a university actively promoting integrity, good governance, and institutional strengthening through multidisciplinary research that has a tangible impact on society.

TEACHING

International Student Teaching Collaboration

PARTNERSHIPS FOR THE GOAL

On September 3, 2023, the KKN Lex program of Universitas Muhammadiyah Surabaya (UM Surabaya), in collaboration with Singapore Polytechnic through the International Teaching Collaboration KKN Lex, successfully enabled students to create various affordable and environmentally friendly tools for siwalan (toddy palm) farmers in Lamongan Regency. The tools include Kiap-Kiap (a tool for massaging both male and female siwalan flowers simultaneously), Kool Eh (a natural siwalan fruit cooler), Anti Slip Gloves (non-slip climbing gloves), and Umbul Bening (siwalan fruit cover).

Kaliswaran Krish Santosh, a Singapore Polytechnic student majoring in Aeronautical Engineering who participated in KKN Lex for 12 days, stated that his observations, together with the UM Surabaya team, raised awareness of the conditions faced by siwalan farmers, leading to the creation of the Kiap-Kiap.

OUTREACH

UMSurabaya Relationship with Regional NGOs and Government for SDGs

In May 2023, the Minister of Tourism and Creative Economy (Menparekraf), Sandiaga Uno, through Superkey Consulting Group (SCG) Sandination, established a collaboration with UM Surabaya, marked by a photo with UM Surabaya Rector Sukadiono at the At-Tauhid Tower.

The collaboration covers four main areas: the implementation of scholarship training programs, the organization of practitioner teaching programs (practitioners as guest lecturers), leadership, career, and business programs, and internship programs along with job placement.

In addition to establishing the collaboration with UM Surabaya, Sandiaga also provided digital marketing training to students, school students, creative communities, and Micro, Small, and Medium Enterprises (MSMEs) aged 17–30.

According to him, the purpose of this activity is to equip participants with youthpreneurship and digital marketing skills to create and open employment opportunities. Sandiaga also motivated participants to explore business opportunities and entrepreneurship.

He added that youthpreneurship skill training can strengthen the economy by creating new jobs. This, in turn, encourages students to become digitally literate and improve their ability to communicate effectively in the modern era.

PARTNERSHIPS FOR THE GOAL

Universitas Muhammadiyah Surabaya has launched a new innovative product called the Smart Chair for Disability, developed by lecturers and students. Funded by the Ministry of Education, Culture, Research, and Technology (Kemendikbudristek), this product is designed to assist students with disabilities during in-person classes. The innovation also received appreciation from Surabaya Mayor Eri Cahyadi during the launch of Bima Tuk-Tuk.

Supporting Village Development, UMSurabaya Fostered Village Project 2023

Under the theme “Balanced Nutrition, Thriving Growth, Preventing Stunting and Metabolic Diseases for a Bright Future,” this activity is part of the community service program organized by the Faculty of Medicine Student Executive Board (BEM FK) of UM Surabaya.

The series of activities began with a briefing and the departure of the committee from the campus to Laladan Village, Lamongan.
